About me

Computer Science student with experience in Frontend development and AI/ML, currently expanding skills in DevOps and system engineering.

Education

- EL Maaref language school 2011-2024
- BSc in Computer and Information Sciences
  El Shorouk Academy – Cairo, Egypt (Expected 2028)

Technical Skills

Programming: C++, C, C#, Python

Web Development: HTML, CSS, JavaScript, Bootstrap

DevOps & Systems:

- Linux (CLI, processes, permissions, file system)
- Bash Scripting
- Git & GitHub
- Networking Fundamentals
- Deployment Concepts

AI & Data Science: scikit-learn, PCA, Classification Models

Experience

Frontend & IT Intern – EFG Holding
Aug 2025 – Sep 2025

- Assisted in front-end development tasks.

- Supported IT operations and troubleshooting.
- Worked in a professional corporate technical environment.

Projects

🔹 Weight Progress Tracker – Full Stack Web Application

Live Demo | GitHub

- Developed a full-stack web application to track and visualize weight progress.
- Designed responsive frontend and structured backend logic.
- Applied version control using Git & GitHub.
- Built with scalability and deployment readiness in mind.

🔹 Heart Disease Prediction Model
GitHub

- Built ML classification model using real dataset.
- Applied preprocessing, PCA, Logistic Regression, Random Forest, SVM.
- Performed hyperparameter tuning and deployed using Streamlit.

🔹 ENGAGE – Interactive Web Platform

Live Demo | GitHub

- Developed responsive web platform with modern UI/UX design.

Certifications

- ITI Mahara-Tech – Linux Fundamentals
- ITI – Web Technology Internship
- AI & Machine Learning Summer Camp

Core Strengths

Problem Solving • Fast Learner • Teamwork • Adaptability • Ability to Work Under Pressure
