

PETER EMAD

Computer Science Student | Aspiring DevOps Engineer

PROFILE

Computer Science student at El Shorouk Academy, currently building hands-on experience in DevOps, Cloud, and Automation. Experienced in Linux, Git, Docker, Docker Compose, CI/CD, networking fundamentals, and Python-based application development. Built practical projects involving containerized applications, Nginx, PostgreSQL, and GitHub Actions. Previous experience in frontend development, IT operations, and AI/ML provides a broader understanding of the software and infrastructure lifecycle.

PROJECTS

DevOps Lab | Containerized Application & CI/CD

- Built a multi-container application using Docker and Docker Compose.
- Containerized a Flask backend, PostgreSQL 16 database, and Nginx reverse proxy.
- Configured service communication using Docker networking and environment-based configuration.
- Implemented application health checks and a GitHub Actions CI pipeline for pushes and pull requests.
- Applied Linux permissions and kept sensitive credentials outside version control using environment variables.
- Used Git and GitHub throughout the development workflow.

Weight Progress Tracker | Full-Stack Web Application

- Developed a full-stack application to track and visualize weight progress.
- Built a responsive frontend and structured backend logic.
- Used Git and GitHub for version control and considered deployment readiness.

Heart Disease Prediction Model |

- Built a machine learning classification model using a real-world dataset.
- Applied preprocessing, PCA, Logistic Regression, Random Forest, and SVM with hyperparameter tuning.
- Deployed the model using Streamlit.

ENGAGE | Interactive Web Platform

- Developed a responsive web platform with a modern user interface and focus on responsive design and user experience.

EXPERIENCE

EFG Holding | Aug 2025 - Sep 2025

Frontend & IT Intern

- Gained hands-on exposure to frontend development and corporate IT operations.
- Assisted with frontend development tasks and supported IT operations and troubleshooting.
- Worked within a professional enterprise technology environment.

Information Technology Institute (ITI) | 2025

Web Technology Intern

- Gained practical experience with HTML, CSS, JavaScript, and Bootstrap through web development and team-based projects.

Sprints x Microsoft Summer Camp | 2025

AI & Machine Learning Intern

- Completed an AI and Machine Learning specialization and applied ML concepts to a practical heart disease prediction project.

EDUCATION

El Shorouk Academy

BSc in Computer and Information Sciences
Expected 2028

EL Maaref Language School

2011 - 2024

TECHNICAL SKILLS

DevOps & Systems

- Linux (CLI, processes, permissions)
- Bash, Git & GitHub
- Docker & Docker Compose
- CI/CD, GitHub Actions
- Nginx, Networking Fundamentals

Cloud & Infrastructure

- Cloud Fundamentals
- Deployment Concepts
- Infrastructure Fundamentals

Programming

- Python, C++, C, C#

Backend & Database

- Flask, PostgreSQL
- REST APIs, SQL

Web Development

- HTML, CSS, JavaScript, Bootstrap

AI & Machine Learning

- scikit-learn, PCA
- Classification Models

CERTIFICATIONS

- ITI Mahara-Tech - Linux Fundamentals
- ITI - Web Technology Internship
- ITI - AI/ML Summer Training
- Sprints x Microsoft - AI & ML Summer Camp
- Udemy - Introduction to Docker
- Kaggle - Introduction to Deep Learning
- Kaggle - Computer Vision

CORE STRENGTHS

- Problem Solving
- Fast Learner
- Teamwork
- Adaptability
- Ability to Work Under Pressure
